PURPOSE AND SCOPE OF THE CONFERENCE

The conference is the next stage of cooperation undertaken by five Polish universities as part of the **Consortium of Central Industrial District - Tradition, Defense**. The main purpose of this conference is to present the offer and research capabilities for the armaments industry. There will also be an opportunity to exchange wide experience and knowledge of university and company workers to strengthen cooperation with the Polish Armaments Group and their co-operators. During the conference the latest achievements in the field of materials science, construction and special-purpose technology are planned together with exhibitions of research and scientific equipment and apparatus. The conference topics concern issues in the field of special technologies (including welding, casting, plastic working, machining and assembly), modern tools and research, innovative production techniques and methods as well as quality and production organization.
